graphics tufted

Custom Graphics Tufting is the art of getting the most from small geometric and linear designs, creating distinctive, highly functional floorcoverings that work with any decorative scheme.

All our stock tufted graphics ranges are proven heavy contract performers, manufactured in our own extensive tufting facility in Blackburn, Lancashire. Each range offers an assortment of colourways suited to most commercial locations.

Algorithm²

CLICK ON ANY
DESIGN
TO VIEW IN
VISUALISER

Every algorithm follows the same discipline. A well-defined set of rules solving a complex problem. Designing a carpet flexible enough for a myriad of interiors and colour schemes takes that same precision.

We've cracked the code with Algorithm², a fragmented, data-like graphic that's the automatic choice for style and performance in any heavy contract scheme.

classic Herringbone

Around since Roman times, the classic herringbone design has adorned everything from apparel to architecture and never goes out of style.

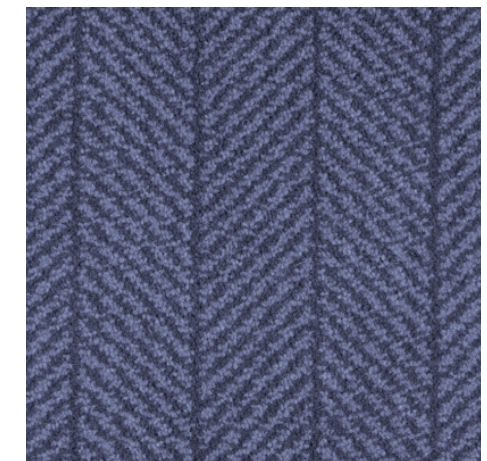

We have taken this time-honoured skeletal pattern and created a collection of subtle tone on tone colourways that would suit a myriad of interior schemes.

Quartet

CLICK ON ANY
DESIGN
TO VIEW IN
VISUALISER

A quartet takes four distinct voices
and brings them into balance,
no single instrument allowed to
dominate the arrangement.

We have applied that same discipline
to colour, layering tonal yarns with
real precision so the pattern reads as
one considered composition rather
than four competing shades.

The Panama hat earned its reputation through a fine, tight weave, prized for its texture and craftsmanship.

We have taken that same handwoven character and reinterpreted it as a hardwearing tufted graphic, translating the intricacy of the original into a construction built for heavy contract use.

Shadow textures

CLICK ON ANY
DESIGN

VISUALISER

Tufted graphics carpet by its very nature can often appear mechanical. To create something which has a more organic and elemental look is very difficult to achieve.

Having investigated all the facts, we have developed the perfect solution, the clue is in the carefully selected tone on tone colourways which offer something new to designers and specifiers alike.

A shadow shifts constantly with the light, never quite the same shape twice, yet always recognisably part of the same form.

We have built that same subtlety into this range, using fine tonal shading to give each design a natural sense of movement rather than a fixed, repeating print.
